Attn.: Prof Behrouz Kassai

Singapore, May 31th, 2011

Dear Professor Behrouz Kassai,

The evaluation report prepared by Dr. Dominique Dubois concerning the European Diploma of Pharmaceutical Medicine (EUDIPHARM) course taught at the Claude Bernard University in Lyon, was reviewed by the members of IFAPP's Council for Education in Pharmaceutical Medicine (CEPM) on April 16th 2011.

It appears from this report that, thanks to a fruitful cooperation between yourself and the evaluator, the programme of the postgraduate course perfectly satisfies the Council's requirements and covers all pieces of knowledge mentioned in IFAPP's Programme for Education in Pharmaceutical Medicine. The same applies for the techniques and characteristics of the assessments and the final examination.

It is our pleasure and privilege to announce that the Pharmaceutical Medicine course at the Claude Bernard University is now formally accredited by the CEPM. You are allowed to mention the accreditation in your information and promotion on the course. Accreditation is awarded for a period of 3 years i.e. until May 2014.

We want to congratulate you and your staff for this achievement and wish you continued success.

Kind regards,

Jean-Paul Deslypere MD PhD
Chairman CEPM

Dominique Dubois MD FFPM FBCPM
Pharmaceutical Medicine Course Evaluator
